

HS02 Code: 84 - nuclear reactors, boilers, machinery and mechanical appliances; parts thereof

YEAR-OVER-YEAR Changes in U.S. Merchandise Export by Country and by Customs District - Twelve months period ending in June, 2009 -- In descending order of Year-Over-Year Change in Value

Prepared for: Simon Pak

Note:

1. This report contains, for the HS code above, value, and market share for the current period in black ink for each country. In addition, it contains changes in all the variables from the same period one year ago, year-over-year changes in blue ink.
2. If a country has no trades during either the current period or the previous period, then value and market share for the period without any trade are set to zero. Please note that year-over-year changes are calculated as the difference between values during the current period and the corresponding values during the same one year ago.
$$\text{Year-Over-Year Changes} = (\text{Amount during Current Period}) - (\text{Amount during Same Period one year before})$$
3. Definitions:
Market Share in Value (%) = $100 * (\text{Value for a country}) / (\text{Total Value for US-All Countries})$
4. Import Value is based on District of Entry data, not District of Unlading.

Data Source: The Bureau of Census, U.S. Department of Commerce
