Prepared for: Simon Pak

Note:

- 1. This report contains, for the country or country-customs combination, frequency, value, quantity, market shares, average unit value, and the ratio of unit value to r for every HS code at 10 digit level.
- 2. If an HS code does not have a defined unit of measure, then quantity, market share in quantity, average unit value, and the ratio of unit value to median price are set to zero.

3. Definitions:

Frequency = Card count during the period Market Share in Value (%) = 100*(Value for a country)/(Total Value for US-All Countries) Market Share in Quantity (%) = 100*(Quantity for a country)/(Total Quantity for US-All Countries) AvererageUnit Value = (Value)/(Quantity) Ratio of Unit Value to Median Price = (Average Unit Value)/(Median Price for US-All Countries)

4. Import Value and Quantity are based on District of Entry data, not District of Unlading.
