

**U.S. Merchandise Import from UNITED KINGDOM through PHILADELPHIA, PA. Customs District by HS Code at 10 digit level -
Year-to-date ending in June, 2009 (Ordered in HS10 code)**

Prepared for: Simon Pak

Note:

1. This report contains, for the country or country-customs combination, frequency, value, quantity, market shares, average unit value, and the ratio of unit value to median price for every HS code at 10 digit level.
2. If an HS code does not have a defined unit of measure, then quantity, market share in quantity, average unit value, and the ratio of unit value to median price are set to zero.
3. Definitions:
Frequency = Card count during the period
Market Share in Value (%) = $100 * (\text{Value for a country}) / (\text{Total Value for US-All Countries})$
Market Share in Quantity (%) = $100 * (\text{Quantity for a country}) / (\text{Total Quantity for US-All Countries})$
Average Unit Value = $(\text{Value}) / (\text{Quantity})$
Ratio of Unit Value to Median Price = $(\text{Average Unit Value}) / (\text{Median Price for US-All Countries})$
4. Import Value and Quantity are based on District of Entry data, not District of Unloading.
