# YEAR-OVER-YEAR Changes in U.S. Merchandise Import from UNITED KINGDOM by HS Code at 10 digit level - During the month of June, 2009 (Descending order of Year-Over-Year Changes in Value) 

Prepared for: Simon Pak

## Note:

1. This report contains, for the country or country-customs combination, value, quantity, market shares, average unit value, and the ratio of unit value to median pri for the current period in black ink for every HS code at 10 digit level.
In addition, it contains chages in all the variables from the same period one year ago, year-over-year changes in blue ink.
2. If an HS code does not have a defined unit of measure, then quantity, market share in quantity, average unit value, and the ratio of unit value to median price are set to zero.
3. If a country has no trades during either the current period or the previous period, then value, quantity, market shares, average unit value, and the ratio of unit val for the period without any trade are set to zero.
Please note that year-over-year changes are calculated as the difference between values during the current period and the corresponding values during the sam one year ago.

Year-Over-Year Changes = (Amount during Current Period) - (Amount during Same Period one year before)
4. Definitions:

Market Share in Value (\%) $=100^{*}$ (Value for a country)/(Total Value for US-All Countries)
Market Share in Quantity $(\%)=100^{*}$ (Quantity for a country)/(Total Quantity for US-All Countries)
AvererageUnit Value = (Value)/(Quantity)
Ration of Unit Value to Median Price = (Average Unit Value)/(Median Price for US-All Countries)
5. Import Value and Quantity are based on District of Entry data, not District of Unlading.

Data Source: The Bureau of Census, U.S. Department of Commerce
